

# Table of Contents

Foreword.....	2
How to create web-based application easily?.....	2
How this book can help you learn Tapestry?.....	2
Unique contents in this book.....	2
Target audience and prerequisites.....	2
Acknowledgments.....	2
Chapter 1 Getting Started with Tapestry.....	9
What's in this chapter?.....	9
Developing a Hello World application with Tapestry.....	9
Installing Eclipse.....	9
Installing Tomcat.....	9
Installing Tapestry.....	11
Installing Spindle.....	12
Creating a Hello Word application.....	13
Generating dynamic content.....	17
Changes don't take effect?.....	24
Using the Tomcat plugin.....	27
Debugging a Tapestry application.....	28
Making changes to Java code take effect.....	30
Summary.....	30
Chapter 2 Using Forms.....	32
What's in this chapter?.....	32
Developing a stock quote application.....	32
Creating the result page.....	35
Displaying the Result page in the listener.....	38
Easier way to create the action listener.....	40
Instance variables may breach security.....	40
Using implicit components.....	44
Using a combo box.....	45
Using the DatePicker.....	46
Using the component reference.....	48
Summary.....	50
Chapter 3 Validating Inputs.....	52
What's in this chapter?.....	52
Postage calculator.....	52
What if the inputs are invalid?.....	53
Using a ValidField.....	60
Using a FieldLabel.....	63
Customizing the validator.....	64
Creating your own validator.....	66
Showing all the errors.....	67
Using informal parameters.....	70
Performing validation using Javascript.....	71
Errors that don't belong to any input field.....	73
Easier way to display the original page.....	74
Other validators.....	74
Summary.....	75
Chapter 4 Creating an e-Shop.....	76
What's in this chapter?.....	76
Creating an e-shop.....	76

Showing the product details.....	78
Implementing a shopping cart.....	83
Distinguishing which button was clicked.....	84
Adding a product to the shopping cart.....	86
How Tomcat and the browser maintain the session.....	90
Another way to maintain a session.....	94
Implementing checkout.....	96
Letting the Confirm page protect itself.....	106
Calling back a page that takes parameters.....	107
Discarding unused persistent properties.....	109
Passwords are exposed.....	110
Making the visit object serializable.....	111
Dangerous use of persistent property.....	111
Implementing logout.....	114
Letting Tapestry create a global object for you.....	114
Summary.....	116
Chapter 5 Creating Custom Components.....	117
What's in this chapter.....	117
Displaying a copyright notice on all pages.....	117
Should Copyright.html be a complete page?.....	121
What does allow-body mean?.....	122
Creating a Box component.....	123
Customizing the Box component using informal parameters.....	126
Customizing the Copyright component using formal parameters.....	127
Accessing a parameter as a property.....	128
Using "auto" connected parameter property.....	130
Making a parameter optional.....	130
Creating a RGB component.....	131
Documenting a component.....	137
Reusing components in another project.....	139
Summary.....	147
Chapter 6 Supporting Other Languages.....	148
What's in this chapter.....	148
A sample application.....	148
Supporting Chinese.....	148
How to internationalize an implicit component.....	153
An easier way to insert a message.....	153
Internationalize the page content.....	153
Letting the user change the locale.....	156
Easy way to run native2ascii.....	163
Selecting the current locale in the combo box.....	165
Localizing the full stop.....	168
Displaying a logo.....	170
Localizing the logo.....	174
Putting the images into other places.....	175
Creating a license page.....	177
Observing the output encoding.....	183
Creating a Logo component.....	184
Setting the ALT attribute of the logo.....	185
Packaging the Logo component.....	186
How can the browser access the GIF files?.....	190
Copying private assets into a public folder.....	191

Summary.....	192
Chapter 7 Using the Table Component.....	194
What's in this chapter?.....	194
Creating a phone book.....	194
List the entries in alternating colors.....	198
Storing the styles in a file.....	200
Sorting the entries.....	203
Customizing how to get the cell value.....	207
Customizing the column titles.....	208
Making the styles work again.....	210
Making the first name a link.....	211
Listing more entries.....	213
Tuning the performance of the Table component.....	215
Session is used.....	223
Caching the entries.....	223
Adding a delete button.....	225
Sort by Delete?.....	232
Moving the page links to the bottom.....	232
Summary.....	238
Chapter 8 Handling File Downloads and Uploads.....	239
What's in this chapter?.....	239
Downloading a photo.....	239
Using a service.....	243
Displaying a photo.....	246
Downloading a photo using a form.....	251
Telling the size of the download.....	252
Uploading a photo.....	252
Summary.....	254
Chapter 9 Providing a Common Layout.....	256
What's in this chapter?.....	256
Providing a common layout.....	256
Setting the page title.....	260
Disabling the link for the current page.....	262
Using a header.....	263
Summary.....	266
Chapter 10 Using Javascript.....	267
What's in this chapter?.....	267
Are you sure to delete it?.....	267
Reusing the script.....	269
Generating a unique function name.....	272
Encapsulating the use of scripts in a component.....	275
Summary.....	277
Chapter 11 Building Dynamic Forms.....	279
What's in this chapter?.....	279
Editing a list of users.....	279
Adding a new user.....	281
A form should remain unchanged.....	283
How to update the database.....	289
Adding a Delete checkbox.....	292
What if another person has deleted a user.....	296
Performing validation.....	300
Selecting the country and city of a user.....	305

Keeping the cities between rendering and rewind.....	309
Working with validation.....	312
Summary.....	316
Chapter 12 Test Driven Development with HtmlUnit.....	317
What's in this chapter?.....	317
Developing a calculator using test driven development.....	317
Setting up HtmlUnit.....	318
Setting up the web application context.....	319
Implementing the add operation.....	321
Providing a list of operations.....	329
Using the setUp() method.....	330
Refactoring.....	332
Implementing the History link.....	334
Fixing the problems revealed by manual inspection.....	338
Running all the tests.....	341
Implementing validation.....	341
Implementing the Help link.....	344
Summary.....	347
Chapter 13 Database and Concurrency Issues.....	349
What's in this chapter?.....	349
Developing a banking application.....	349
Setting up PostgreSQL.....	349
Hard coding some bank accounts.....	357
Transferring some money.....	358
Using a transaction.....	361
Connection pooling.....	363
Concurrency issues.....	366
Long transaction.....	379
Dividing the application into layers.....	390
Summary.....	398
Chapter 14 Using Hibernate.....	400
What's in this chapter?.....	400
Setting up Hibernate.....	400
Adding an id not exposed to the user.....	402
Specifying the mapping.....	403
Accessing objects with Hibernate.....	404
Updating the database schema.....	406
Hard coding some customers programmatically.....	406
Running the Hibernate-enabled application.....	410
Manipulating associations between objects in the database.....	411
Accessing the accounts using Hibernate.....	412
Accessing the associations between a customer and his accounts.....	414
Putting it together.....	417
Listing the accounts of a customer.....	418
Dividing the Customer class into two.....	421
Summary.....	422
Chapter 15 Integrating with Struts.....	424
What's in this chapter?.....	424
Integrating Tapestry with Struts.....	424
Running a sample Struts application.....	424
Rewriting the Logon page in Tapestry.....	431
Invoking a Tapestry page from JSP and invoking a Struts action from Tapestry....	433

Implementing rendering part of the Logon page.....	435
Implementing the rewinding part of the Logon page.....	439
Rewriting a JSP include file as a Tapestry component.....	441
Accessing the global message resources in Struts .....	443
Invoking a Tapestry page that takes parameters from JSP.....	448
Summary.....	450
References.....	451
Alphabetical Index.....	452
